output by

## Poult Production

Since the first of the year, the output of turkey poult<sup>s</sup> totaled 101,330,000--up 24 percent from the comparable output in 1960. The cumulative output of heavy white breeds was 27,372,000, up 49 percent; other heavy breeds 64,010,000, up 17 percent; and light breeds 9,948,000, up 17 percent. Turkey eggs in incubators on August 1, indicate that the hatch of heavy white breed poult<sup>s</sup> in August will be larger than in August 1960. The hatch of other heavy breeds and light breeds is expected to be smaller than in August 1960.

Pou 1-1 (8-61)
